

AUGUST OLIVIA

3-DAY TRAINING PLAN

Age 25 · 5'2" · 109 lbs · 3-Day Program (assumed — TBD)

60%
TECHNIQUE

DAY 1 — LOWER BODY FOUNDATION

Squat & Posterior Chain — Technique Priority

TECHNIQUE DAY · LIGHTER LOADS · FULL ATTENTION TO FORM

60% day — technique priority given new-client status and ALST At-Risk profile. Form takes precedence over load; no PRs this block. Left leg leads all unilateral work per Styku segmental LST.

Protein Reminder

ALST At-Risk — hit your protein target today (99–109g). Creatine with your first meal.

Warm-Up

5 min bike, bodyweight squat x10, glute bridge x10, band walk x10/side

A — GLUTE ACTIVATION & LEFT-LED UNILATERAL PREP

Left leg is the weaker side (Styku LST) — activation before loading.

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Banded Lateral Walk	2	10/side	mini band	continuous	30s	Push knees out, small controlled steps.
Glute Bridge	2	15	bodyweight	2-1-1	30s	Squeeze glutes hard at the top.

B — PRIMARY STRENGTH — SQUAT & HIP THRUST

60% day — technique priority. 3+ RIR, focus on form over load.

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Back Squat	3	5	35 lbs	3-1-1	90s	Brace, knees track over toes, full depth. 3+ RIR
Hip Thrust	3	5	45 lbs	2-1-2	90s	Drive through heels, squeeze at top. 2-3 RIR

C — UNILATERAL LEG & CORE

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Single-Leg RDL <i>Left leads — weaker leg (Styku LST)</i>	3	5/side	17.5 lbs/hand	3-1-1	60s	Lead with left leg — weaker side. 2-3 RIR
Plank Hold	2	50s hold	bodyweight	hold	45s	Brace core, neutral spine, breathe steady.

Cool-Down

Couch stretch 60s/side, child's pose 60s, hamstring stretch 60s/side

ICONS Note

New client — 3-day split assumed pending client schedule confirmation. Prioritize clean squat depth and hip thrust lockout over load this block.

70%
MODERATE

DAY 2 — UPPER BODY & SHOULDER CORRECTIVES

Pressing Priority — Right Shoulder Force Asymmetry Protocol

MODERATE INTENSITY · RIGHT SHOULDER CAUTION · CONTROLLED TEMPO

70% day — moderate strength. Right shoulder force-plate asymmetry (63.2%) means pressing loads stay conservative until rate-of-force quality improves bilaterally. Left arm leads unilateral pulling per Styku LST.

Protein Reminder

ALST At-Risk — hit your protein target today (99–109g). Creatine with your first meal.

Warm-Up

5 min row, band pull-apart x15, arm circles x10/direction, scap push-up x10

A — SHOULDER FORCE ASYMMETRY PROTOCOL

Right shoulder is slower to peak force but faster RFD — bilateral quality check before loading.

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Band External Rotation	2	15/side	light band	2-0-2	30s	Elbow pinned, rotate slow, control return.
Band Pull-Apart	2	15	light band	2-0-1	30s	Squeeze shoulder blades together.

B — OVERHEAD PRESS — CONSERVATIVE LOAD

2 RIR ceiling on pressing — right shoulder caution per force-plate flag.

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Seated Overhead Press <i>Right shoulder caution — force-plate flag</i>	3	5	12 lbs	2-1-1	90s	Brace core, press straight, even both sides. 2 RIR
Incline Push-Up	3	8-10	bodyweight	2-0-1	60s	Full range, chest to bar, even tempo both arms.

C — UNILATERAL PULL — LEFT-LED

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Single-Arm DB Row <i>Left leads — weaker arm (Styku LST)</i>	3	8/side	15 lbs	2-0-1	60s	Lead with left arm — weaker side. 2 RIR
Dumbbell Farmers Carry	3	30 sec	25 lbs/hand	steady	60s	Tall posture, braced core, even steps.

Cool-Down

Doorway chest stretch 60s/side, cross-body shoulder stretch 30s/side

ICONS Note

Right shoulder produces force fast but tops out low (70N vs 190N peak) — monitor quality, not just load, on every pressing set.

70%
MODERATE

DAY 3 — FULL BODY STRENGTH & LOADED CARRIES

Deadlift Introduction + Carry Progression

MODERATE INTENSITY · TECHNIQUE-FIRST DEADLIFT PATTERN

70% day — full body. Deadlift pattern introduced at light load — untested lift, priority is hinge technique before loading. Today's working loads become the new 8-week baseline.

Protein Reminder

ALST At-Risk — hit your protein target today (99–109g). Creatine with your first meal.

Warm-Up

5 min bike, hip hinge with dowel x10, glute bridge x10, band walk x10/side

A — HIP HINGE PREP

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Dowel Hip Hinge	2	10	dowel	2-1-1	30s	Push hips back, dowel stays in 3 contact points.
Banded Lateral Walk	2	10/side	mini band	continuous	30s	Push knees out, small controlled steps.

B — DEADLIFT TECHNIQUE INTRODUCTION

Light load, 3+ RIR — establishing hinge pattern as the new baseline.

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Hex Bar Deadlift	3	5	45 lbs	2-1-1	90s	Push floor away, brace before every rep. 3+ RIR
Back Squat	3	5	40 lbs	3-1-1	90s	Brace, full depth, knees track over toes. 2 RIR

C — LOADED CARRY & CORE

EXERCISE	SETS	REPS	LOAD	TEMPO	REST	COACHING CUE
Dumbbell Farmers Carry	3	30-40 sec	27.5 lbs/hand	steady	60s	Tall posture, shoulders back, even steps.
Plank Hold	2	55s hold	bodyweight	hold	45s	Brace core, neutral spine, breathe steady.

Cool-Down

Hamstring stretch 60s/side, 90/90 hip stretch 60s/side, child's pose 60s

ICONS Note

Deadlift and lunge baselines untested — log today's working loads as the new baseline for 8-week tracking.
